## Summer Multiplication Challenge

Multiplication and Division are a big deal in $3^{\text {rd }}$ Grade! Please practice multiplying by $\mathbf{1 , 2 , 3}, \mathbf{4}$, and $\mathbf{5}$ at least twice a week for 10 minutes or more. You can work on larger numbers too for a challenge, but having a foundation in these lower numbers will make a big difference entering $3^{\text {rd }}$ Grade!

Place an $X$ in each box to track your progress. Your teacher will collect the log when you return in August.
